

HORDE

Created by Sophie Clyde

Game premise:

You are a mighty dragon soaring through the mountains, seeking to build your hoard of gold and gems by collecting the gold coins you find on your flight. You must avoid crashing into the mountains as you collect your treasures and must gather enough gold before the moon fully rises and you must return to your lair to rest.

Game instructions:

Click on the buttons on the main screen to begin playing in Level Mode, Infinity Mode, or see the Instructions page.

Use the arrow keys to move around the screen and collect the gold coins you see. Take care to avoid crashing into the mountains as you'll lose health when you crash – if you crash too many times you'll run out of health and the game will end.

In Level Mode, you're in a race against the clock – you need to gather 3000 points before time runs out to win. As you gain more points the coins will get smaller and faster, and the background will change as the sun goes down. Be bold and take risks to gather your treasure before time runs out but beware of getting too close to the mountains! Drained health can take you out even faster than the ticking clock can.

In Infinity Mode, you'll continue gathering coins as long as you have health remaining, but the coins speed up with every second that goes by, making them harder and harder to collect without running afoul of the mountainsides. You'll have to play it safe to rack up a high score!

When you end the game, a screen will appear with your final score and you'll return to the main menu, so you can play again or switch modes.
